

**Governing Council
Sixty-fourth Session**

GC/64/7
8 April 2022

Lyon, 12–13 May 2022
By web conference

UPDATE ON THE “NOUVEAU CENTRE” AND ON RESOURCE MOBILIZATION

INTRODUCTION

1. Please refer to [document GC/61/10](#), paragraphs 1–8 for the project historical details.
2. Since 2012, the City of Lyon had invested in a programme of urgent repair works for the Tower building (ventilation, air-conditioning and heating systems) in order to ensure occupancy for five to seven years (until 2019). Despite these concentrated efforts, and as the lifespan of the Tower had expired, the state of the building remained a major concern and continued to cause unanticipated interruptions in the Agency’s work.
3. In 2021, several issues with the central heating system forced us to definitively turn off the heating in the basement, ground floor, first and second floors of the Tower, where most of the Administration staff are posted. The other floors and buildings were also affected by several interruptions of the heating system, leading most of IARC personnel to telework whenever feasible.
4. Force-majeure teleworking, similar to what has been imposed by the COVID-19 pandemic, was one solution imposed in case of major technical disruptions, except for the laboratories and the biobank which remain a priority to retain open, as also outlined in IARC Business Continuity Plan.

FINANCING THE BUILDING PROJECT

5. Please refer to [document GC/61/10](#), paragraphs 10–19 for historical details on the funding of the building project.
6. The global budget of the project was revised by the Métropole de Lyon in 2018 to include the amount of the Design-Build contract, taking into account the latest adjustments in the design of the building and has been increased to €51.6 million; cost increases of €2.4 million are equally shared between the Métropole and the Auvergne-Rhône-Alpes Region.
7. However, in 2021, due to the COVID-19 context and other adaptations of the project, the Métropole de Lyon assessed that the building project would need additional funding and voted an additional budget of €7.8 million. The Métropole de Lyon is currently discussing with its partners how to share that additional budget. IARC was also approached, but IARC Secretariat stated that on one hand IARC’s status and host agreement prevented the Agency from participating in the funding of the building itself and on the other hand IARC still needed to find additional funding to equip the building.

CURRENT SITUATION AND PROJECT TIMELINE

8. Please refer to [document GC/63/11](#) paragraphs 9–16 to get the historical details on the design and build phases of the project.
9. The building works are still ongoing. Due to the COVID-19 context, the Métropole de Lyon officially agreed with the Design and Build team to extend the overall timeline of the project which has led to rescheduling of the delivery of the building. The revised project timeline is as follows:
 - *Building works until end of September 2022.*
 - *IARC anticipated works-already started (biobank set up and IT infrastructure) from February to October 2022.*
 - *Set-up of conference rooms and physical move from 28 October to 31 December 2022.*
 - *Official opening of the Nouveau Centre on 2 January 2023.*
 - *Official inauguration ceremony on 12 May 2023.*
10. In parallel, IARC Secretariat is working on all the procedures to end the activities in the current premises, liaising with the Ville de Lyon, owner of the building.

FINANCING THE NOUVEAU CENTRE PLUS PROJECT

11. Aside from the budget adjustments by the Métropole de Lyon mentioned in paragraph 7 above, the finalized “*Programmiste*” study allowed the Secretariat to better define the overall costs of the project, which led to certain cost elements being identified as outside the scope of the Métropole de Lyon’s financial responsibility. These cost elements inter alia include the physical move of operations of a substantial number of biobank samples requiring specialized transportation; the purchase, transport and installation of laboratory equipment and benching; and the installation of specific security requirements as mandated by UN Security Standards.
12. Other potential costs associated with the move relate to modernization to ensure the best possible working environment in the new IARC Headquarters. This includes the replacement of some of the oversized or old office furniture, outdated laboratory equipment, as well as auditorium and meeting room video and sound systems. The Agency would also like to take this opportunity to replace old freezers in the biobank and transition to a modern, automated system.
13. During the detailed design studies phase (September 2018–October 2019) additional adjustments to the project were made, incurring supplementary costs.
14. The overall investments for a fully operational modern, smart and open building originally estimated at €13.4 million, were re-assessed in 2021 to be compliant with IARC new Medium-Term Strategy (MTS), and mainly thanks to the hard efforts of IARC Procurement Office to get the best proposals from its suppliers, the overall investment budget was thus readjusted at €11.38 million as of March 2022, which would allow IARC to deliver its full potential and further expand its activities.
15. In early 2020, in order to help the resource mobilization efforts, the Governing Council Working Group on Infrastructure requested IARC Secretariat to address the funding gap issue and develop investment prioritization strategy scenarios for all the additional items ([GC/62/8 – Annex 1](#) refers).

16. As of 25 March 2022, the budget status to equip the Nouveau Centre is as follows:

Priority	Definition	Overall Costs at 25/03/2022	Funds secured	Funds identified but not secured	Funding Gap
1	Critical item or earmarked donation	€6.76 million	€6.25 million	€0.15 million	€0.36 million
2	Non-critical item, rebuilding existing capacity	€1.62 million	€0.03 million	-	€1.59 million
3	Investment in upstream sectors	€3.00 million	-	-	€3.00 million
	GLOBAL	€11.38 million	€6.27 million	€0.15 million	€4.95 million

17. Within the last two years, the Secretariat has put all its efforts to raise funds to cover at least Priority 1 items which are essential for the reopening of the Agency. So far, the Secretariat managed to identify the following funding to partially cover these costs:

- The Director has put in place a mechanism to set aside €1.5 million from earned overheads over the five-year period 2015–2019 to partially cover the physical move.
- The Director agreed to charge €164 000 from the unbudgeted assessments from new Participating States (UB) to cover some necessary and essential adjustments during the design phase.
- The residual balance of funds previously approved by the Governing Council (Resolution GC/54/R6 refers).
- Anticipated revenue from sales of old furniture and equipment ([Resolution GC/60/R10](#), paragraph 3 refers).
- Savings from operational budget over the period 2020–2021 (€1.5 million).
- Thanks to the generosity of Norway, €142 948.36 will be used to equip the biobank.
- Thanks to the generosity of a major donor, €1 million was mobilized to fully equip the Auditorium.
- The Governing Council approved in May 2021 a €1 million loan from the Governing Council Special Fund to cover the purchase of Priority 1 items, to be reimbursed over a five-year period from the operational budget and/or resource mobilization results ([Resolution GC/63/R11](#) paragraph 5 refers).
- In-kind donations from suppliers for an amount of €12 553. It is worth noting that other in-kind donation agreements with four companies have been finalized by the Secretariat but as IARC has not received the goods physically yet, these donations cannot be accounted for in 2021 and will be reported for the year 2022.
- In 2021, the Nouveau Centre fund raising campaign managed to mobilize financial resources amounting to a total of €69 924.83 (through the online platform [isupport.iarc.fr](https://support.iarc.fr), on IARC website Nouveau Centre donation page, as well as through financial contributions from Non-State Actors). This amount is net of bank charges but the IARC indirect cost of 13% will have to be levied prior to the allocation of funds to the Nouveau Centre project.
- 2020–2021 and 2022–2023 operational budgets also partially cover the usual purchases of furniture and equipment.

18. Notwithstanding the above, an unfunded balance remains to be mobilized. As of March 2022, the overall funding gap amounts to €4.95 million, of which €0.36 million still need to be mobilized to cover Priority 1 items.

19. The Secretariat has thus made the “Nouveau Centre” one of the priorities in its resource mobilization efforts at least until 2023.

FURTHER RESOURCE MOBILIZATION EFFORTS: THE “NOUVEAU CENTRE” FUNDRAISING CAMPAIGN

20. As described during the last Governing Council in May 2021, the Secretariat has developed a three-pronged strategy to mobilize in-kind and financial resources for the Nouveau Centre project. This strategy includes:

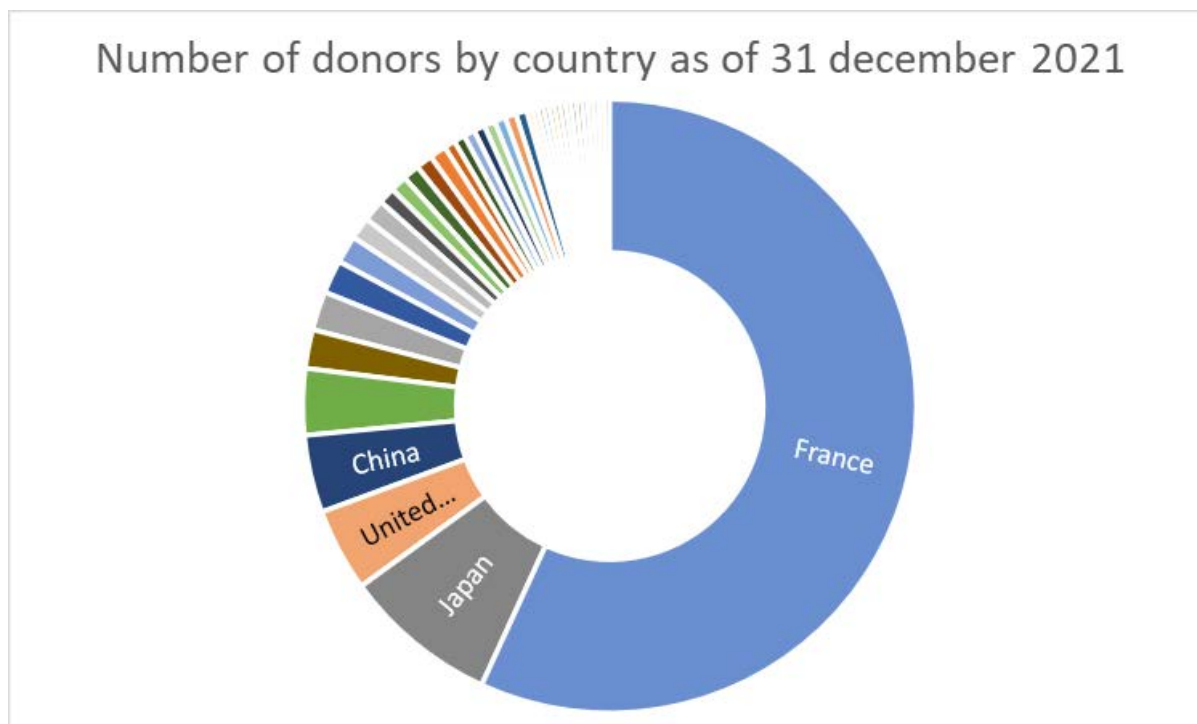

- Local campaign targeting major donors and key influencers in Lyon and its surroundings.
- In-kind contribution campaign targeting corporate, for-profit entities.
- Major gift campaign targeting Ultra High-Net-Worth individuals (UHNWI) and/or Participating States.

21. Over the last year, all three axes of the campaign have been implemented.

22. During the last Governing Council session in May 2021, the IARC Secretariat launched a crowdfunding campaign that gave the possibility to individuals to write their name on the glass doors of the Nouveau Centre in exchange of an affordable donation ([isupport.iarc.fr](https://support.iarc.fr)). Announcement of the campaign was made internally and a media kit (email templates and social media tiles) was shared with IARC personnel and extended network, including but not limited to Scientific and Governing Council members. The Secretariat organized several visits of the Nouveau Centre construction site for local partners (Rotary clubs, Swiss Chamber of Commerce and Industry, Club of CEOs from large companies like Le Prisme, Consulates based in Lyon, etc.) to promote the campaign towards a wide range of potential donors. A press conference was also organized in the Nouveau Centre on 6 July 2021 and relayed in local media. In early 2022, Caroline Garcia, a well-known French female tennis player, was approached to join the “Friends of IARC” initiative, to help bring visibility to IARC on social media.

23. For the year 2021, the crowdfunding campaign yielded a total amount of €40 671 from 344 donations. It was the first time ever for IARC to embark on such an operation focusing on private individual donors. While there have been some constraints in the implementation of this crowdfunding campaign (impossibility to access data collected by IARC over the years, lack of marketing budget to promote the campaign, lack of engagement of IARC own network), it is worth noting that not only the crowdfunding campaign helped mobilize some funding with a minimal financial investment, it has also drastically increased the visibility of the Agency, especially locally in Lyon and its surrounding area.

24. The largest number of donors comes by far from France as this is where there was the highest number of activation events for the campaign (press release, partnership with local organizations, visit to the Nouveau Centre construction site, etc.). However, the engagement of our colleagues from the National Cancer Centre (NCC) Japan should be underlined: thanks to their efforts in promoting the campaign within their national networks, Japan is the second country with the highest number of donors, after France, with almost twice as many donors as from other IARC Participating States with larger populations.

25. The Secretariat was also able to secure a few financial donations, either online through a specific donation page created on IARC website for the Nouveau Centre for a total of €2914.13 or through cash donations from local Non-State Actors (NSA) thanks to the visibility of the campaign amounting to €26 340 (see [Annex 3](#)). The next step for the Secretariat will be to try and get more financial contributions from NSA/companies over the next few months and prior to the move. Partnerships with large association of industries like Chamber of Commerce and Industry (CCI) are currently being explored to reach out to a large number of local companies.

26. In October 2020, the Secretariat formally launched the in-kind contribution campaign on the United Nations Global Marketplace (UNGM). The equipment needed for the Nouveau Centre was divided into three packs: furniture / IT-audio-video / laboratory equipment. Specific donor acknowledgement guidelines were also discussed and finalized with WHO DAN (Due diligence of Non-State-Actors) and WHO LEG (Legal unit).

27. The Secretariat secured in-kind donations of furniture for the most visible and iconic locations of the Nouveau Centre. For example, the company CIDER will provide all the furniture needed for the reception area of the Nouveau Centre. HAWORTH will give the furniture needed for the conviviality space of the first floor while OFFICE CONCEPT is giving all the tables for the ground floor meeting rooms. The company AVI has also provided some audio-video equipment for free for the Nouveau Centre. While these four agreements are finalized and agreed upon by all parties, for a total amount of €112 663.87, the goods have not yet been received by IARC to avoid storage costs. Hence these donations will be reported for the year 2022. The Secretariat is finalizing some agreements with at least five other companies, mostly from the furniture sector, for a total amount that should be more than twice that of 2021. Two companies have already delivered their in-kind donations to IARC in 2021: FROILABO (-80 degree fridge) and COMADEQUAT (in-kind donation of services to help promote the crowdfunding campaign) for a total amount of €12 553.

28. Regarding the major gift part of the campaign, as reported last year during the 63rd session of the Governing Council, the Secretariat has been able to secure one large private donation and another from one of IARC Participating States: Norway. The Secretariat is currently discussing with a few potential major donors, especially from the Middle East geographic area.

29. The Secretariat has also worked on a possibility to engage more meaningfully with potential donors, being IARC Participating States or High Net Worth Individuals. The Secretariat has identified 11 locations on the ground floor that could be named after a country, a city or even a well-known cancer scientist. These locations can be split into two categories: meeting rooms and other iconic locations. They are distributed as follows:

- One meeting room with capacity of 100 people
- Two meeting rooms with capacity of 50 people
- Two meeting rooms with capacity of 30 people
- One training room with capacity of 15 people
- One videoconference room with capacity of 15 people
- 4 remaining iconic locations: reception hall, atrium garden, cafeteria and the library
- The auditorium will bear the name of Dr Christophe Mérieux, Alain Mérieux’s late son

30. The Secretariat offers the possibility to name one of these locations in recognition of a voluntary contribution made by an IARC Participating State. Every contribution higher than €100 000 will give the opportunity to name one of the meeting rooms. This will be done on a first-come first-served basis. For the iconic locations, this will have to be discussed bilaterally with the Secretariat. To illustrate the universal mandate of IARC, the Secretariat hopes that some Participating States could come forward and name one of these locations with the name of their country or city or even the name of one of their national scientists who helped advance cancer research.

31. In accordance with previous Governing Council discussions, IARC will carry over the name of Princess Takamatsu and/or Sasakawa Halls into the Nouveau Centre. One of the meeting rooms will be attributed to them.

32. Last but not least, it is important to mention that the recent past and still current environment is not conducive to handle such large capital campaigns. Unfortunately, the sanitary crisis has diverted the attention and the funds to COVID-19 relief work while other health issues, such as cancer, struggle to mobilize adequate resources. Hopefully, in the next few months, the situation will come back to a certain normal and will allow for more openness to other causes than the COVID-19 crisis relief.

**Annex 1 – Online donations #NouveauCentre
accepted by the Director from January to December 2021
(amounts in euros)**

Online donations

22/01/2021	Maria Valdivieso (France)	5.00
