7 Dec. 2022	LSB = Laboratory Support, Biobanking and Services	Péter NAGY; Sergey A. IVANOV

Branch	Flash talk title	Name of presenter	E-mail address of the presenter	If applicable, cross-branch structure / interdisciplinary interactions (list other Branches)	Take away message
LSB 0	Introduction	Zisis Kozlakidis	kozlakidisz@iacr.who.int	N/A	N/A
LSB 1	The Laboratory Services and Biobanking (LSB) activities	Zisis Kozlakidis	kozlakidisz@iacr.who.int	All branches with a laboratory component	The Laboratory Services and Biobanking Unit is a cross-cutting function of the Agency providing support to ongoing and future laboratory research activities, while providing one of the more extensive biobanking units in Europe where samples can be safely stored for the short- and longer-term.
LSB 2	The Impact of COVID-19 on Cancer (IMCOCA) grant	Zisis Kozlakidis	kozlakidisz@iacr.who.int	N/A – collaboration with Centre Léon Bérard and Lyon University 1	The current pandemic has been highly disrupting to many areas of healthcare activity and research. At the same time, it has provided the opportunity to analyse the responses to this emergency situation. IMCOCA looks at the many cancer guidelines that have been produced by healthcare bodies during the pandemic (with a particular focus in France), and analyses if all those guidelines were followed, and if not, why not. Thus, useful knowledge is provided to build back better the healthcare responses to any similar future situation.
LSB 3	Developing Microbiome-based studies	Zisis Kozlakidis	kozlakidisz@iacr.who.int	Part with NME (i.e. one out of the three studies presented here)	The microbiome is a significant part of the individual healthcare context, yet a deeper understanding of its many facets starts to slowly emerge through standardised, high-throughput research applications and analyses. Three such recent studies are presented here, highlighting the impact of microbiome studies in the current cancer research field.
