

LIST OF EPR's FLASH TALKS FOR SC/59

Date	Branch	Name of SC members
8 Dec. 2022	EPR = Early Detection, Prevention and Infections	Louisa GORDON; Marc ARBYN; Kalipso CHALKIDOU

Branch	Flash talk title	Name of presenter	E-mail address of the presenter	If applicable, cross-branch structure / interdisciplinary interactions (list other Branches)	Take away message
EPR	Overview of EPR activities	Partha Basu	basup@iarc.who.int	N/A	N/A
EPR 1	Integration of HPV vaccination and HPV cervical screening in young adult WLWH into ARV clinics to speed the pathway towards cervical cancer elimination: the H2VICTORY study	Dr Armando Baena	baenaa@iarc.fr	N/A	A combined dual intervention (HPV vaccination + HPV screening) among women living with HIV attending ARV clinics in sub-Saharan Africa may reduce cervical precancer and contribute to speed up elimination of cervical cancer
EPR 2	Assessing HPV vaccination program effectiveness in LMIC	Dr Iacopo Baussano	baussanoi@iarc.fr	N/A	Real-life evidence of impact in LMIC, according to different implementation strategies, is key to evaluating progress towards WHO cervical cancer elimination goal
EPR 3	Improving estimates of the global burden of cancer attributable to EBV – building an investment case for prevention	Dr Jean-Damien Combes	combesjd@iarc.fr	Collaboration with CSU	Global and local estimates of infection-attributable cancer burden are key to raising awareness and informing resource allocation for primary cancer prevention initiatives. Such indicators for EBV, however, are not yet available, due to uncertainty in contribution of EBV to a number of cancer types (e.g. gastric carcinoma, lymphoma)
EPR 4	Matching barriers and interventions to improve cancer screening participation: case study in 22 countries in Latin American and Caribbean countries	Dr Isabel Mosquera Metcalfe	mosquerai@iarc.fr		A framework on barriers to cancer screening was adapted from the Tanahashi model, and each barrier was matched with evidence-based interventions (EBI). The framework included the following dimensions of coverage of cancer screening services: availability, accessibility, affordability, acceptability, contact and effectiveness. Twenty-two countries from Latin America and Caribbean ranked 80 barriers linked to 6 steps of the cancer

Branch	Flash talk title	Name of presenter	E-mail address of the presenter	If applicable, cross-branch structure / interdisciplinary interactions (list other Branches)	Take away message
					screening continuum, and prioritized barriers on quality assurance and information systems. A matrix associating each barrier with EBI (whenever available) was provided to the countries to select the most suitable intervention for the selected barriers.
EPR 5	A collaborative initiative between the IARC and the Department of Health in Ireland to support the delivery of an exemplar Cervical Cancer Screening Programme	Dr Arunah Chandran	chandrana@iarc.fr	Collaboration with COM and RMO	The initiative aims to create an improved legal, ethical and implementation framework for cancer audit and communication transparency in cervical cancer screening, the relevance, and implications of which transcend the geographic boundaries of Ireland and address a global issue of improving quality and coverage of cancer screening.

For information: list of other Branches

Date	Branch	Name of SC members
6 Dec. 2022	CSU = Cancer Surveillance	Ferrán CATALÁ LÓPEZ; Manami INOUE; <u>Valery LEMMENS</u>
6 Dec. 2022	ESC = Evidence Synthesis and Classification	Mathilde TOUVIER <i>[unable to attend unless a conflicting meeting becomes virtual]</i> ; Ravi MEHROTRA; Einas Abudlaziz Eid AL KUWARI
7 Dec. 2022	GEM = Genomic Epidemiology	William GALLAGHER; Jong Bae PARK; Gunilla ENBLAD
7 Dec. 2022	EGM = Epigenomics and Mechanisms	Walter BERGER; Luis Felipe Ribeiro PINTO; <u>Satish GOPAL</u>
7 Dec. 2022	LSB = Laboratory Support, Biobanking and Services	Péter NAGY; Sergey A. IVANOV
8 Dec. 2022	ENV = Environment and Lifestyle Epidemiology	<u>Jeanette FALCK WINTHER</u> ; Pietro PICHIERRI; <u>Ben SPYCHER</u>
8 Dec. 2022	LCB = Learning and Capacity Building	Jie HE; Karima BENDAHOU; Sirpa HEINÄVAARA
23–27 Jan. 2023	<i>NME (Review)</i>	<i>Tone Bjørge + Ulrike Haug + Marie-Elise Parent + 3 external experts</i>
